

## **WELCOME TO THE ALPINE GARDEN SOCIETY'S 58th SEED LIST**

**On-line ordering:** For the first time, we are offering the opportunity to look at the seed list on-line, order and pay for your seed order. We will be working to ensure parity between on line ordering and postal ordering so neither system will get priority. Please go to <http://www.alpinegardensociety.net/seed/exchange/> and follow the instructions on the web page

**Please read through these notes** and also the notes on the back of the order forms before completing the forms. The main distribution will begin in December and should take 4 – 5 weeks.

**The seeds offered** originate from various sources and cannot be guaranteed true to name. Neither The Alpine Garden Society nor any official of the Society can be held responsible for what is supplied. Members are reminded that named cultivars and hybrids cannot be relied upon to come true, and plants raised from seed from cultivars should not be labelled with the names of those cultivars.

**Seeds of many species are in short supply** and we can never have enough to meet all requests. Members who request very rare or popular species must realise that they are likely to be disappointed and are advised to spread their requests throughout a variety of seeds on the list.

**Surplus seeds** are those remaining after all applications for main distribution seeds have been met. Please see the notes on the back of the order form for further information.

**Members outside the UK and the EU** are reminded that most countries restrict the import of some species. It is the responsibility of members from overseas to check the laws covering seed importation before ordering to make sure that anything they request is not on their country's list of banned imports. Failure to do this could cause confiscation and destruction of all the seed within the imported packet at the point of entry to your country. Overseas members should pre-check the list of approved species by contacting their local Ministry of Agriculture. Guidance on restricted species may be found on:

<http://www1.maf.govt.nz/cgi-bin/bioindex/bioindex.pl> (New Zealand)  
<http://www.nargs.org/RestrictedSeed/> (USA)

**Wild Collected Seed:** Some further information about wild collected seed, including collection areas may be available on request from:  
Diane Clement, 194 Compton Road, Wolverhampton, WV3 9JX.  
Email: [diane.clement@agsgroups.org](mailto:diane.clement@agsgroups.org)

## Wild Collected Seed

The initials after the plant name refer to the donor, please refer to the donor pages at the back of the booklet for codes. If a species has 2 or more donors, it is indicated by >2. Details of some of the collection areas may be available on request from Diane Clement 194 Compton Road Wolverhampton, WV3 9JX or by e-mail: diane.clement@agsgroups.org

## **Why has your seed donation not appeared on the list?**

You may have sent in a donation of seed and cannot find it listed. Here are some possible reasons from the Seed Reception team, and some guidance for next time.

1. Your seed may have leaked out into the main envelope or onto the floor of the seed checker. Many donations are packed into inappropriately sized envelopes and are not sealed well enough, or packed too tightly, causing them to burst.
2. Your seed may not have been dry before you packaged it and may then have gone mouldy. Please make sure seed is dry before packing it. Please don't send seed encased in berries which will rot before they get packed. Please remove all fleshy berries and dry the seed before sending.
3. Your writing may have been difficult to read and we could not read the name of the seed (or your own name). Please print clearly on the form. Please check the name on the seed packet matches the name on your form. There are many discrepancies and this makes the job of cataloguing difficult at times.
4. Your donation may have arrived too late to be entered. The closing date this year was October 12th. If seed arrives after this date, the reception team will try and include it on the list. However, some seed does arrive some considerable time after the closing date, and in those cases it may not be possible to include it on the list.
5. Your seed may have been labelled with an incorrect or invalid name according to the rules of plant nomenclature. Many names can be checked in the current edition of 'The Plant Finder'. If we can correct the name of your seed, we will do so, but it may then appear under a different name than the one supplied.
6. You may have sent in seed that is under-developed, not ripe or not viable. Members of our reception team inspect donated seed and remove seed that is not going to germinate.
7. Some plants are regarded as invasive weeds in the UK and/or Europe so we do not list them. This includes *Heracleum mantegazzianum*, *Impatiens glandulifera*, *Reynoutria japonica*, *Senecio jacobaea* and others. Please do not send in seed of these species or other invasive weeds.
8. Seed of plants protected by CITES can not be included under Wild Collected Seed. This includes some species of the genera *Cyclamen*, *Galanthus* and *Sternbergia* as well as all members of the family *Orchidaceae*
