

## **WELCOME TO THE ALPINE GARDEN SOCIETY'S 60th SEED LIST 2011-12**

**Please read through these notes** and also the notes on the back of the order forms before completing the forms. The main distribution will begin in December and will continue into the new year.

**The seeds offered** originate from various sources and cannot be guaranteed true to name. Neither The Alpine Garden Society nor any official of the Society can be held responsible for what is supplied. Members are reminded that named cultivars and hybrids cannot be relied upon to come true, and plants raised from seed from cultivars should not be labelled with the names of those cultivars.

**Seeds of many species are in short supply** and we can never have enough to meet all requests. Members who request very rare or popular species must realise that they are likely to be disappointed and are advised to spread their requests throughout a variety of seeds on the list.

**Surplus seeds** are those remaining after all applications for main distribution seeds have been met. Please see the notes on the back of the order form for further information.

**On-line ordering** will again be offered this year. You will be able to view the seed list, make your selections, order and pay for your seed order on line. We will take care to ensure parity between on line ordering and postal ordering so neither system will get priority. Please go to

<http://www.alpinegardensociety.net/seed/exchange/>

and follow the instructions on the page.

**Overseas Members:** Members outside the UK and the EU are reminded that most countries restrict the import of some species. It is the responsibility of members from overseas to check the laws covering seed importation before ordering to make sure that anything they request is not on their country's list of banned imports. Failure to do this could cause confiscation and destruction of all the seed within the imported packet at the point of entry to your country.

Overseas members should pre-check the list of approved species by contacting their local Ministry of Agriculture. Guidance on restricted species may be found on the following sites:

New Zealand: <http://www1.maf.govt.nz/cgi-bin/bioindex/bioindex.pl>

USA: <http://www.nargs.org/>

USDA regulations do not permit the importation into the USA of any parasitic species, any species of the genus *Lathyrus* (without treatment), any member of the families Berberidaceae and Rutaceae, nor the seed of any trees or woody species.

## Wild Collected Seed

The initials after the plant name refer to the donor, please refer to the donor pages at the back of the booklet for codes. A species with 2 or more donors is indicated by >2. Details of some of the collection sites may be available on request from: Diane Clement, 194 Compton Road, Wolverhampton, WV3 9JX or by e-mail:

### Collection Numbers

Some seed originates from wild collected seed, and plants deriving from these collections may retain the collector's initials if they are felt to be a distinct form. Here are explanations of some of the collections and collectors who are referred to in the list this year.

ACE	Alpine Garden Society Expedition to China 1994
BC&W	Kenneth Beckett, Martyn Cheese and John Watson
BSBE	Bowles Scholarship Botanical Expedition 1963
CC	Chris Chadwell
CD&R	James Compton, John D'Arcy and Martyn Rix
CSE	Cyclamen Society Expedition
FK	Fritz Kummert
F&W	Anita Flores & John Watson
G&K	Martin Gardner & Sabine Knees
JCA	Jim Archibald
JJA	Jim & Jenny Archibald
JJH	Josef Halda
JWB	John Blanchard
KV	Kurt Vickery
MESE	AGS Macedonia & Epiros Seed Expedition 1999
MS	Mike Salmon
NNS	Northwest Native Seed (Ron Ratko)
RRW	Bob & Rannveig Wallis
SBEC	Sino-British Expedition to Cangshan 1981
SSSE	Sino-Scottish Sichuan Expedition 2002
STAR	Norman Stevens and Jim Archibald Iran 2005

## Addendum

- 5801 Alcea rosea 'Nigra'  
5802 Alstroemeria hyb  
5803 Anemone sibirica  
5804 Aquilegia vulgaris Vervaeneana Gp  
5805 Asclepias incarnata  
5806 Astragalus loanus  
5807 Astrantia major involucrata FK976

## Plant Names in the Seed List

This is the tenth seed list I have produced for the AGS seed exchange, and over those years there have been many changes in the actual plant names. The way I check names has also changed as the Floras gradually become outdated by websites.

The plant reference websites have improved in recent years, both in content and accuracy, and also in their ease of use. The main references I have used this year are:

The RHS Horticultural Database <http://apps.rhs.org.uk/horticulturaldatabase/>

The Plant List <http://www.theplantlist.org/> which is a working list of all known plant species and is a collaboration between The Royal Botanic Garden, Kew and the Missouri Botanical Garden.

The Kew Checklist of Selected Plant Families (includes all monocots, Lamiaceae, Campanulaceae and others) <http://apps.kew.org/wcsp/>

Flora Europaea <http://rbg-web2.rbge.org.uk/FE/fe.html>

Efloras: <http://www.efloras.org/>

USDA Plant checklist <http://plants.usda.gov/java/nameSearch>

Pavel Slaby's Rock Garden Plant Database <http://www.kadel.cz/flora/kvSearch.asp.htm>

There have been many name changes over the years and I know that these changes are a frustration to many growers. There are several reasons for name changes: the new name may be actually a previously published name which has precedence over the old one, sometimes two species have been merged or sometimes a subspecies has been given specific status. Some of the bigger changes are due to the work of the Angiosperm Phylogeny Group, or APG, who are taxonomists working on a new system of flowering plants that reflects recent knowledge about their relationships. The most recent version was published in 2009 as APG III. APG looks into relationships between plants by considering their molecular characteristics and not just morphological characteristics which have previously been among the main ways in which we have established relationships between groups of plants.

Some significant family changes have recently taken place, e.g. Alliaceae and Hyacinthaceae have disappeared, and others such as Scrophulariaceae have undergone radical changes. However, as far as the seed list is concerned, family changes do not affect the name we call the plant, but genus changes do and this year I felt it appropriate to start to make changes to the seed list at genus and specific level. I understand that some new genera may take a while to be recognised so I am making the changes gradually. That in itself may draw some criticism as it may be felt that there are inconsistencies in the list, but it has been done in the best interests of the membership. I have listed below some of the changes to the names most frequently occurring in the list and some older changes as reminders.

Old name	New name
Anomatheca laxa	Freesia laxa
Calochortus luteus	Calochortus nuttallii
Cheiranthus cheiri	Erysimum cheiri
Chionodoxa (all species)	Scilla
Dicentra lichiangensis	Dactylicapnos lichiangensis
Dicentra macrantha	Ichthyoselmis macrantha
Dicentra macrocapnos	Dactylicapnos macrocapnos
Dicentra scandens	Dactylicapnos scandens
Dicentra spectabilis	Lamprocapnos spectabilis
Dicentra spectabilis 'Alba'	Lamprocapnos spectabilis 'Alba'
Dicentra torulosa	Dactylicapnos torulosa
Lychnis alpina	Silene suecica
Merendera (all species)	Colchicum
Muscari azureum	Pseudomuscari azureum
Muscari pallens	Pseudomuscari pallens
Muscari pseudomuscari	Pseudomuscari chalusicum
Schizostylis coccinea	Hesperantha coccinea
