

Wild Collected Seed

The initials after the plant name refer to the donor, please refer to the donor pages at the back of the booklet for codes. If a species has 2 or more donors, it is indicated by >2. Details of some of the collection areas may be available on request from AGS Centre, Avonbank, Pershore, Worcs, WR10 3JP

STAR seed

Some seed remains from last year's collection by Norman Stevens and Jim Archibald in Iran, which was made for and on behalf of AGS Seed Distribution Ltd. It has been stored in a refrigerator since the last distribution to maximise viability. There are no restrictions to the allocation of this seed this year. Further information on collection sites, etc can be obtained from AGS Pershore

Donors

The Society would like to express its thanks to all the members who have donated to the Seed Exchange this year - their support is much appreciated.

Donors who have donated wild-collected seed have been designated a code which is referred to in the Wild collected section of the list.

Some notes on nomenclature

1. *Leucojum*

All the small species of *Leucojum* have been assigned to a new genus, *Acis*. The species of *Leucojum* retaining their old names are *LL aestivum* and *vernus*. The name changes of the other species are listed below:

Old names	New names
<i>Leucojum autumnale</i>	<i>Acis autumnalis</i>
<i>Leucojum autumnale operanthum</i>	<i>Acis autumnalis oporantha</i>
<i>Leucojum longifolium</i>	<i>Acis longifolia</i>
<i>Leucojum nicaeense</i>	<i>Acis nicaeensis</i>
<i>Leucojum roseum</i>	<i>Acis rosea</i>
<i>Leucojum tricophyllum</i>	<i>Acis trichophylla</i>

2. *Meconopsis* (Fertile Blue Group) Lingholm

This is the only cultivar at present grown from the group of seed-raised perennial tall blue poppies (other than the species *M betonicifolia*, *M grandis*, and *M simplicifolia*). Unfortunately *Meconopsis* Lingholm is often distributed under the names *M sheldonii* and *M grandis*. The true species *M grandis* has recently been reintroduced into cultivation but exists in only a few gardens. The vast majority of plants in cultivation under the name *Meconopsis grandis* are *Meconopsis* 'Lingholm'. We have only listed plants under the name *M grandis* if we are absolutely sure of their origin.

3. Collector's numbers

Collector's numbers are only used in the seed list if they are from first generation seed of that number, or if the plant has not been identified at specific level. Sometimes we have retained the collection number for a distinct form or variety.

Some collector's numbers of seed commonly submitted are listed below:

Collectors numbers	Full names
Hippeastrum BC&W 5028	<i>Rhodophiala mendocina</i>
Hippeastrum BC&W 5038	<i>Rhodophiala advena</i>
Hippeastrum BC&W 5154	<i>Rhodophiala aff andicola</i>
Incarvillea ACE 2278	<i>Incarvillea zhongdianensis</i>
Incarvillea ACE1600	<i>Incarvillea mairei mairei</i>
Incarvillea ACE2420	<i>Incarvillea mairei</i>
Penstemon PC&H 148	<i>Penstemon campanulatus</i>
Rhodophiala BC&W 5028	<i>Rhodophiala mendocina</i>
Rhodophiala BC&W 5038	<i>Rhodophiala advena</i>
