

WELCOME TO THE ALPINE GARDEN SOCIETY'S 56th SEED LIST

Please read through these notes and also the notes on the back of the order forms before completing the application forms. The main distribution will begin in December and should take 4 – 5 weeks.

The seeds offered originate from various sources and cannot be guaranteed true to name. Neither AGS Seed Distribution nor any official of the Society can be held responsible for what is supplied. Members are reminded that named cultivars and hybrids cannot be relied upon to come true, and plants raised from seed from cultivars should not be labelled with the names of those cultivars.

Seeds of many species are in short supply and can never be plentiful enough to meet all requests. Members who request only very rare or popular species must realise that they are likely to be disappointed and are advised to spread their requests throughout a variety of seeds on the list.

Surplus seeds are those remaining after all applications for main distribution seeds have been met. Please see the notes on the back of the order form for further information.

Members outside the UK and the EU are reminded that most countries restrict the import of some species. It is the responsibility of members from overseas to check the laws covering seed importation before ordering to make sure that anything they request is not on their country's banned list of imports. Failure to do this could cause confiscation and destruction of all the seed within the imported packet at the point of entry to your country. Overseas members should pre-check the list of approved species by contacting their local Ministry of Agriculture. Guidance on restricted species may be found on:

<http://www.nargs.org/RestrictedSeed/> (USA)

Wild Collected seed from South America

This year, we are fortunate in being able to offer seed collected by Anita Flores and John Watson. All the seed listed below was collected in Argentina except nos 021 and 022 which were collected in Chile. Allocation of seed from this section nos 001 – 044 will be limited to a maximum of two packets per member. Further detailed information, including collection sites, etc can be obtained from Diane Clement (contact details on first page).

Some notes on nomenclature

1. Fritillaria

There have been some changes in *Fritillaria* nomenclature. Some previous names have been reinstated and some new names and combinations have been devised. The main changes are listed below for reference

Old names	New names
<i>Fritillaria affinis tristulis</i>	<i>F affinis</i>
<i>Fritillaria grayana</i>	<i>F biflora biflora</i>
<i>Fritillaria karaghadensis</i>	<i>F crassifolia karaghadensis</i>
<i>Fritillaria pontica substipilata</i>	<i>F graeca thessala</i>
<i>Fritillaria thessala ionica</i>	<i>F graeca thessala</i>
<i>Fritillaria thessala ochridana</i>	<i>F graeca thessala</i>
<i>Fritillaria eduardii</i>	<i>F imperialis inodora</i>
<i>Fritillaria grandiflora</i>	<i>F kotschyana grandiflora</i>
<i>Fritillaria crassifolia kurdica</i>	<i>F kurdica</i>
<i>Fritillaria collina</i>	<i>F latifolia</i>
<i>Fritillaria rhodocanakis</i>	<i>F macrandra</i>
<i>Fritillaria rhodocanakis argolica</i>	<i>F macrandra</i>
<i>Fritillaria montana</i>	<i>F orientalis</i>
<i>Fritillaria tenella</i>	<i>F orientalis</i>

2. Meconopsis (Fertile Blue Group) Lingholm

This is the commonest cultivar at present grown from the group of seed-raised perennial tall blue poppies (other than the species *M betonicifolia*, *M grandis*, and *M simplicifolia*). Unfortunately *Meconopsis Lingholm* is often distributed under the names *M sheldonii* and *M grandis*. The true species *M grandis* has recently been reintroduced into cultivation but exists in only a few gardens. The vast majority of plants in cultivation under the name *Meconopsis grandis* are *Meconopsis Lingholm*. We have only listed plants under the name *M grandis* if we are absolutely sure of their origin. If you donate *M grandis*, it would be useful to have a confirmation that this is the true species.

If you would like to ask any questions on nomenclature, collection numbers, etc, please write or e-mail to Diane Clement (contact details on first page)
